1. Safe working load is based on an approximate 2:1 safety factor, 3,000 psi concrete, and a 1/2" setback from surface of concrete.
2. Minimum coil penetration warning on Page 47 applies.
3. Minimum concrete thickness = L + setback + 3/4" clear cover.

The CX-2 Straight Coil Loop Insert is fabricated with one straight loop strut resistance welded to a coil. It is available in diameters from 1/2" through 1-1/4" and in the standard lengths and safe working loads shown in the Table. Other lengths and equipped with Cone-Fast Cones are available on special order. Minimum spacing of inserts shall be double the minimum edge distance.
